

Gantt Chart

A Gantt chart is a project management tool used to plan and schedule projects of all sizes. Project management tasks are converted into a horizontal bar chart in the Gantt chart, with start and end dates, dependencies, scheduling, and deadlines. This project's updated Gantt chart is shown below:

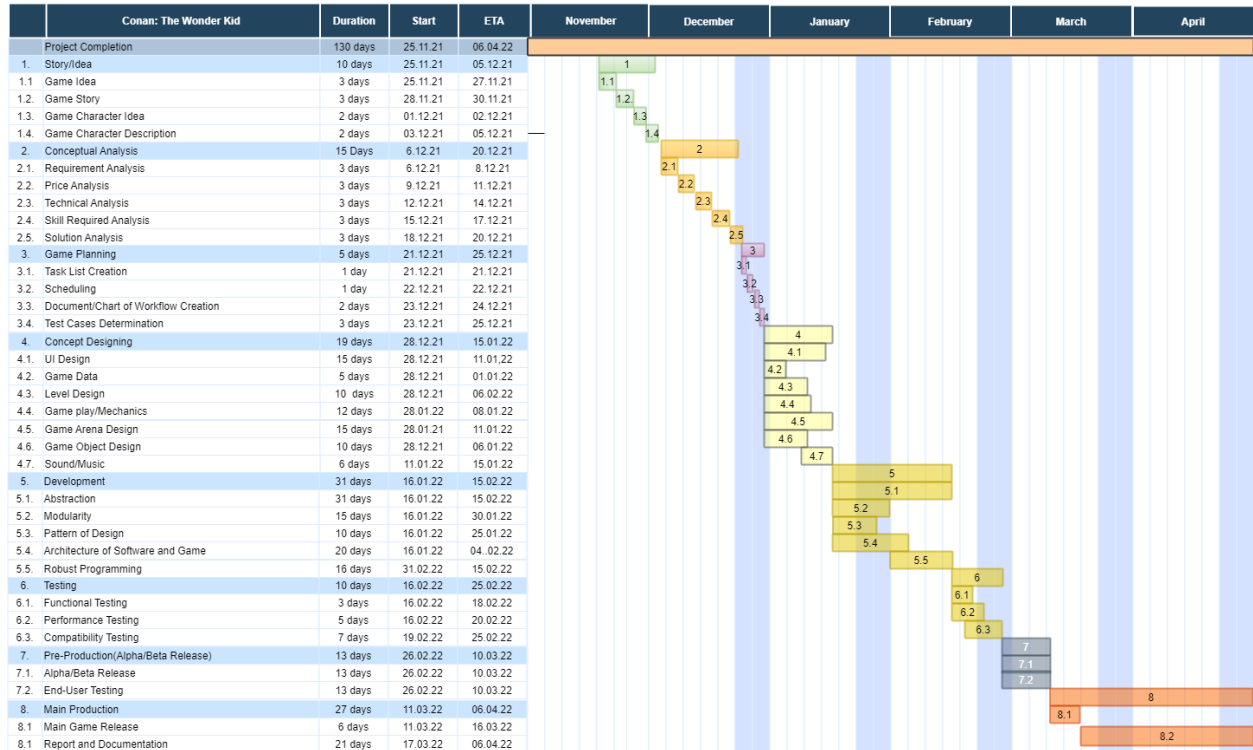

Figure 1: Initial Gantt Chart

This is the first Gantt Chart created while making interim report.

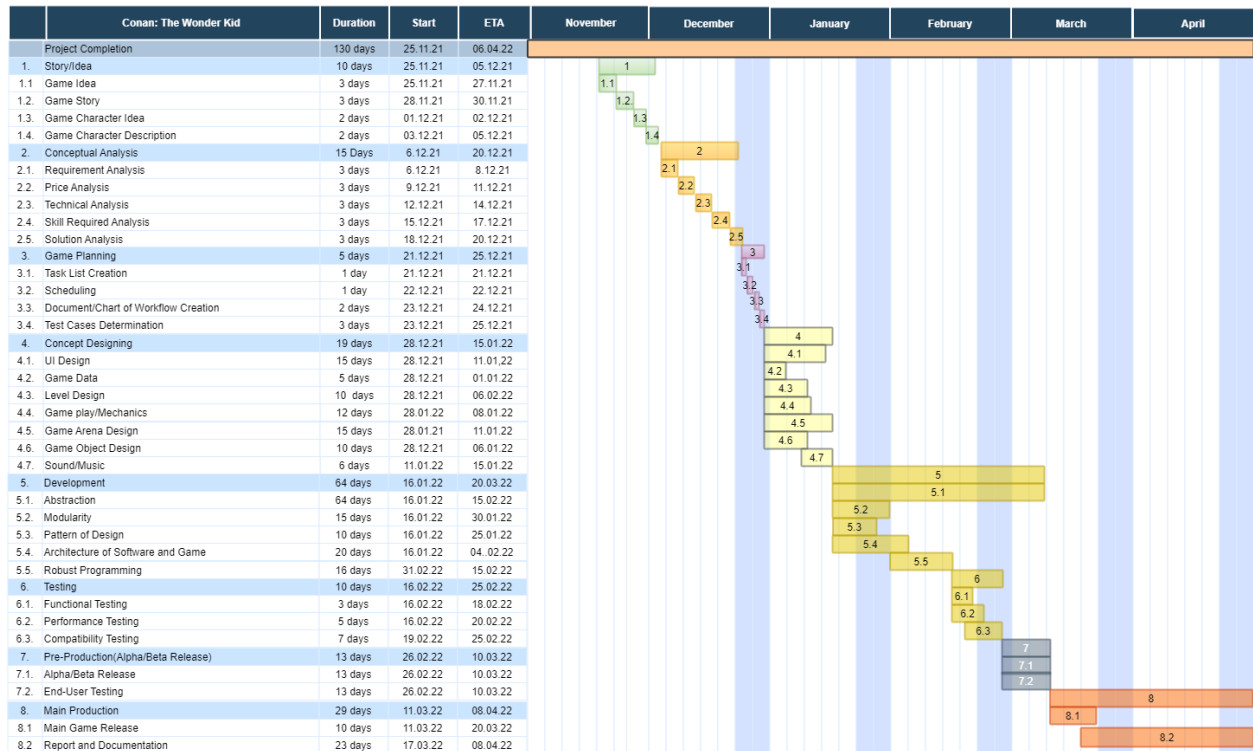

Figure 2: Final Gannt Chart

This the final Gannt Chart arranged according to the logbook and work done.
